THE PACIFIC NEWS.

Union of Californians for the sake of California.

VOL. 1. SAN FRANCISCO, DECEMBER 11, 1849. NO. 47.

SAN FRANCISCO.

Tuesday, Dec. 11, 1849.

☞ Mr. S. C. UPHAM, who carries our paper to our regular subscribers in San Francisco, will also receive weekly subscriptions, and deliver the paper regularly to those who may so subscribe.

☞ For a clear statement of the difficulties between the Administration, at Washington, and the French Minister, see supplement.

The first Session of the first Legislature of the State of California.

No State of the Union, since the first organization of the Federal Government, has ever convened its first Legislature, under circumstances so fitted to fix the attention of intelligent men, all over the world, as those which will attend the opening of the Legislative Session which is to take place, at San Jose, on Saturday, the 15th inst. The occupancy of this great section of the Pacific Coast of the Western Continent, by an American population, bringing with it all the elements and institutions of the Civilization of Popular Power, is one of those great events which occur only once in the lapse of centuries, and, like the first emigrations to Jamestown, and to Plymouth, must be regarded as conspicuous landmarks in the progress of our race. And such events have usually developed themselves slowly and gradually. The tide of population—such is the general fact—flows in, in a slender current. The wonder of the spectacle dies away before the infant and feeble colony has become a powerful, or even an organized and independent State. But here, we behold the reverse of all this. Under the urgency of new and splendid inducements, a sovereign State, peopled from all the world, yet thoroughly American in its spirit and destiny, has grown up in a single summer. Every sign of the times indicates that this community, so suddenly formed and so rapidly organized into a State sovereignty, is, in the course of the next year, to be increased by an influx of population probably far larger than that which has taken place during the year that is past; and, however this may be, no reasonable doubt can now be entertained, that the territory within its jurisdiction, exhibits an opulence of resources hereafter to be developed, entirely without a parallel in the present era of the world.

Of this community, so existing and so circumstanced, the approaching session of the Legislature at San Jose, is to be the first regular Legislative manifestation. Without the aid of any preliminary Territorial organization, emanating from the people or sanctioned by the vote of Congress, this Legislature is to perform the important and delicate office of putting all the machinery of a complete State Government in operation. It is an endeavor upon which the eyes of thinking men throughout our own country and other countries may well be fixed, and towards which they will assuredly be turned, with an impatient interest. It is a political problem, the solution of which abounds in most novel incidents, and is fraught with future results, which no imagination can, at this time, fully grasp and comprehend.

In a previous article, we have already thrown out, in a brief and cursory manner, our ideas, as to the nature and extent of legislative business—in respect to the organization of the different departments of the State Government,—which, under the Constitution, will devolve upon the Legislature at its first session. The Constitution prescribes that within four days after its meeting, the Legislature shall proceed to the election of Senators to represent the State in the Senate of the United States. As the Legislature convenes, and will doubtless organize, on Saturday, the 15th inst., the following Monday may be devoted to the inauguration of the Governor; and if so, the election of Senators will probably take place on Tuesday. Up to this time, there has been no considerable sign of political excitement or agitation among us. We have, on the contrary, presented the aspect of a community too much absorbed in private pursuits even to spend time to go up, in mass, to the polls Yet we cannot doubt, that there is among the people throughout the State, a deep and strong conviction of the importance to all our State interests, of selecting the best and most useful men that can be found to represent our State in the Senate. We regard the absence of public excitement upon the subject, as an indication of the general confidence of the people, that the men whom they have chosen to form their first Legislature, will perform this important duty in an enlightened and patriotic spirit.

We had hoped to be able, at this time, to give a complete list of the members of the Legislature. But we have not, as yet, ascertained how the election has resulted in the district of Sonoma. We still think it very probable, however, that Gen. Vallejo is chosen Senator. The following are, we believe, the Senators elect from the other districts of the State:

THE SENATE.

Sacramento.	*San Jose.*
John Bidwell,	W. R. Bassham.
E. O. Crosby,	*Monterey*
T. J. Green,	S. E. Woodworth.

The Gold Region.

We extract from the London Evening Mail, of 29th August last, the following view of the character of the gold region of California. The whole letter is evidently the production of a scientific man, and seems far more accurate in its views than most of the publications which appeared in the foreign journals about the same time.

To understand the subject properly, it is necessary to study the *locale* in the only map which we have hitherto received, which is probably very imperfect. The Sierra Nevada is a long range of mountains, from which flow into the river Sacramento ten or more tributary streams, and into the San Joaquin seven. In the beds and on the banks of every one of these streams are found gold deposits in strata of various depths.

This general distribution of the metal proves that the whole face of the Sierra is richly impregnated with it, and that by the disintegration of the quartz rock which forms its matrix, a fresh supply, forming a new stratum, is carried down with every winter's flood. Now, giving credit to Mr Lyell's theory, that certain geological effects in parts of America which he explored have required for their production, the continued atmospheric influences and action of nearly 100 000 years, is it not possible that for a large portion of this term the Sierra Nevada may have been pouring its riches into the beds of the above named two rivers?

It may appear at first sight that the weight of the metal would arrest its course *in transitu*, but although this might be the case with the heaviest lumps, as by far the greatest portion of gold is found in laminæ, or thin flakes, the bulk of these must have been carried down by the winter torrents into the beds of the great rivers, and thus an enormous deposit of this precious metal will probably be found where the tributary streams run into them.

And in this case, how to get at it? This will easily be done by establishing screw propelled iron steamers on the rivers, furnished with dredging apparatus to raise the soil where the gold is most likely to be found, and supplied also, with every utensil and vessel necessary

for separating the gold and melting it into ingots. These vessels might be at constant work, winter and summer; best in winter, as there would then be water enough to carry them a good way up most of the tributary streams. Can it be doubted that such an undertaking, in addition to the workings of 100,000 aspirants for wealth at the dry diggings, would produce gold enough to unsettle its relative value? And, in addition to this apparently inexhaustible field, viz: in the vicinity of the two named rivers, gold has been found on the river Gila, at the head of the Mexican Gulf, six hundred miles south of the present workings, and also in the neighborhood of Cape St. Lucas, six or seven hundred miles still further south, the extreme southern point of the Californian peninsula, in lat 22 deg. (See "Travels" of G. Shelvock, in Kerr's edition of Voyages and Travels, vol. ii, page 4.) It may be said, that admitting the utmost success that could attend the California workings, the quantity of gold in circulation is so large that such an addition could have no appreciable effect on its value. This is an egregious mistake, however. It will hardly be believed that the whole quantity of gold currency in the world, taking it at its usual estimate of one hundred and fifty millions sterling, would only weigh about one thousand one hundred and fifty tons, and that in bulk a room twenty feet long, twelve wide, and ten feet high, would contain it all.

I have only one more observation to make. It may be asked how it happens that the recent discovery of gold in California can be capable of producing an effect so different from anything that has yet been experienced. Gold mines have often been discovered before, and energetic measures taken to render them productive, and yet the world jogs on without perceiving any difference. But the present state of things is entirely without a parallel. Never has it yet happened that a whole country side has been found strewed, as it were, with the precious metal, and attainable in abundance by individual enterprise and exertion.—With the exception, I believe, of the gold dust imported from Africa, the only sources of supply at present are the product of mines for the most part deep in the bowels of the earth, and worked by the aid of powerful machinery, the veins meandering in threads and scales, and rarely extending themselves into sheets, through primitive rocks requiring to be blasted. I believe this to be the case with the celebrated mines in the Ural Mountains, where, notwithstanding that the power applied to their exploitation is no doubt limited only by the extent and capabilities of the field, yet the average annual produce for the last ten years amounts, by official returns, only to 3,400,000*l.* sterling.

Our Streets.

We have seen, with much gratification, the efforts which are now making by the City Government, "to mend the ways" of our City. We have always supposed that the work would have been sooner commenced, had the City Treasury been sufficiently in funds. A friend who is well informed upon the matter, writes as follows:

With no other pecuniary resource than a revenue slowly acquired through the medium of Licenses to citizens, the Common Council could not, until quite recently, defray even the current expenses of the Town, arrising from an established Police and from Hospital, Prison and Cemetery charges. The first sale of town lots, however, placed the treasury in an independent situation, when no time was lost by the council in responding to the most manifest wants and wishes of every one residing here, by an apropriation of $10,000, to repair streets; which sum is now being judiciously expended for the purpose intended, under the supervision of a practical engineer. The improvement thus far, is more visible than elsewhere, at and near the corners of Montgomery and Sacramento streets, where, by ditching, draining and grading, a way has not only been made practicable but firm and easy.

Other improvements, of a public nature, will follow as soon as practicable, in accordance with the desires of the body of citizens.

While upon this subject of *improving* the streets, we would suggest that some provision should also be made for *lighting* them. At present, portable lanterns are quite too useful, and necessary, to the benighted wayfarer in San Francisco. It may be an encouragement to us of the Pacific Metropolis, to see what was done in this behalf, in the Metropolis of the Atlantic side, when *it* was, as *we* now are, only the beginning of a great Commercial Emporium. The following "Ordinance" was published in New York, in the year 1697, in relation to "Die Heere Straat" or Broadway:

"An ordinance for lighting the streets, afterwards generally enforced throughout the city, was put in operation on Broadway: 'It is resolved as to the regulation of the lights to be put out in the darke time of the moon within this citty, that for the ease of the Inhabitants, that every seaventh house doe every night in the darke time of the moon, until 25 March next, cause a lanthorn and a candle to be hung out on a pole every night. The charge to be defrayed in equal proportion by the inhabitants.'"

Let us emulate the good example, and have, by all means, a light for every seventh house at least.

Expedition of Sir John Franklin.—The Cleveland Plaindealer, of the 5th of October, has a letter, dated "Ste. Marie River," September 28th, announcing the arrival of Sir John Richardson, from the fruitless search after the lost Polar expedition of Sir John Franklin, of whose dreadful fate among the ices of the Arctic ocean, there is left little or no room to doubt. Sir John Richardson, having failed to find even the remotest clue to the Franklin expedition, is now on his way back to England. He left there in April, 1848; and from the Sault Ste. Marie has made the voyage in canoes and boats and overland, a distance of three thousand five hundred miles and back, by way of Lake of the Woods, Mackenzie's river, &c. After reaching the Arctic ocean, they traveled five hundred miles along the coast. He speaks confidently of the existence of a northern passage; practicability, he says, is another question, the summers being only from thirty to sixty days long

The Alta California, made its first appearance yesterday, as a Tri-Weekly. It will be issued on Mondays, Wednesdays and Fridays. This first number is a handsome, well edited sheet, and promises well for those which are to follow. We wish this new undertaking of our neighbors all success, and we congratulate our citizens that by taking both the News and the Alta California, they can now have a fresh newspaper every day in the week, except Sunday.

They toll a bell at Hartford at nine o'clock in the evening. An old puritan custom, to remind sober, steady people, who are visiting their neighbors, that it is time to wish them good night and retire.

CITY ITEMS.

REPORTED FOR THE NEWS, BY "B STON."

Bold Robbery.—On Thursday afternoon last, some person entered the room in the "Boston Exchange," Washington street, occupied by Mr. Geo. H. Campbell, and took therefrom a valuable cloak, and an india rubber cloak and cap. Mr. C. had left his room but a short time before, and accidentally neglected to lock it. There can be but little doubt that there is in town a band of thieves, who intend to gain a living by their nefarious calling, and should any of them be caught it is to be hoped exemplary justice will be meted out to them.

Sad Accident.—Mr. Annis Campbell, jr., formerly of Belfast, Me., had the bone of one of his legs very badly shattered, on Friday evening last, by the accidental discharge of a gun. He was taken to Dr. Stout's Hospital, where the wound was properly dressed, but it proved to be of so serious a nature that Dr. S. thinks amputation will be necessary. Too much caution cannot be used in the use of fire arms, as the almost daily occurrence of accidents, by means of them, fully proves.

Commendable.—It is gratifying to state that the "Haley House," one of the principal hotels in our city, in obedience to the ordinance of the City Council, closed its gambling tables and stopped its music last Sabbath. The Messrs. Haley deserve the more praise for this from the fact that it is a dead loss to them of *five hundred dollars* each day that their tables are closed.

The State Seal.—Caleb Lyons, Esq., of Lyonsdale, has permitted us to examine *the Great Seal of the State of California*, which has been skillfully engraved by Mr. Albert Kuner, from a design by Mr. L., which was submitted to and accepted by the convention that formed the State Constitution.

The seal is about three inches in diameter, around the bowl of which are represented thirty one stars, being the number of states of which the union will consist upon the admission of California. The foreground figure represents the Goddess Minerva, having sprung, full-grown, from the brain of Jupiter. She is introduced as a type of the political birth of the State of California, without having gone through the probation of a territory. At her feet crouches a grisly bear, feeding upon clusters from a grape vine, emblematic of the peculiar characteristics of the country. A miner is engaged, with a rocker and bowl at his side, illustrating the golden wealth of the Sacramento, upon whose waters are seen shipping, typical of commercial greatness, and the snow-clad peaks of the Sierra Nevada, make up the back ground—while above is the Greek motto 'Eureka' ('I have found it') applying either to the principle involved in the admission of the state or the success of the miner at work.

Police Court.—It is gratifying to notice that there has not been a single criminal case before the Alcalde for the last three days; nor has there been a breach of the peace reported in that time

Judge Almond's Court.—This court has been occupied for the past week, almost constantly, with civil cases; mostly actions for damages, brought by passengers against masters and owners of vessels, for non-fulfillment of contracts.

Large Auction Sale.—One hundred and eighty city lots were sold at auction, yesterday forenoon, by Geo. E. Tyler, for the snug little sum of $68.500.

☞ At a meeting of the Board of Directors of the Central Wharf Company, held on the 10th inst., E. D. Keyes was elected Director and Treasurer of the company, and James C. Ward Director, in the places of Rodman M. Price and Frank Ward, resigned. The officers of the company are now—C. V. Gillespie,

President; E. D. Keyes, *Treasurer*; W. D. M. Howard, W. H. Davis, David Dring, A. J. Ellis, James C. Ward, *Directors*; A. M. Van Nostrand, *Secretary*; C. C. P. Parker, *Wharfinger*.

THE HOSPITAL
OF SAN FRANCISCO.

L. H. WALTER, M. D. C. C. JOSLIN, M. D.
Resident Physicians.
JOHN PATTISON, M D. late Prosector of Anatomy and Surgery in the University of New York,
Consulting Physician and Operator in Surgery.

Main entrance on the east or lower side of Stockton street, between Clay and Sacramento streets, south-west of and near the Post Office.

THIS establishment is composed of an extensive range of buildings recently erected, and formerly, in part, occupied for a Hospital by our fellow-citizen Dr. Melhado. Its arrangements are, in all respects, commodious; on a scale, suited to the various and rapidly increasing wants of both citizens and strangers.

The position is one of the best that can be chosen—elevated, healthy, and easy of access, with an abundant supply of most excellent water, and commanding a beautiful view of the bay and neighboring islands. There is also attached to the premises a separate and comfortable building appropriated solely to the Insane, where every attention will be paid that their cases demand. In addition to the above there are large and comfortable Bathing rooms in connexion with the Hospital, with an unlimited supply of hot and cold water at all hours.

The Hospital of san Francisco is the first, and, in fact, the only Institution established in California, on a broad, liberal and sure foundation. It will be a refuge for the sick—a home for the invalid, where comfortable rooms, good nursing, best of medical attention and healthy and appropriate diet, and all that can be done to alleviate human suffering and conduce to a speedy restoration to health will be afforded.

The Terms are placed on the most liberal basis, being in truth, about one-third or one-fourth less than the expenses necessarily encountered by the sick in this country under any other arrangement.

VOL. 1. SAN FRANCISCO, ALTA CALIFORNIA. DECEMBER 11. 1849. NO. 47.

The French Difficulties.

The views of the Government, as set forth in the Republic, touching the conduct of the French Minister are worthy of public consideration. They are briefly considered as follows:—

1st. That they do not presuppose the existence of unfriendly relations between the two countries.

2d. Every nation is at liberty to dismiss any foreign minister, at its pleasure, on the occurrence of any thing which is offensive to its dignity or character—of which it is itself, of course, to be the sole judge; and that as no nation has ever undertaken to resent such a step as a hostile or unfriendly act, some ulterior action on the part of France will be necessary to interrupt the amicable relations which exist between her and the United States.

3d. That the President finding it apparent, that the French government wholly refused to redress the wrong inflicted by the French minister, felt himself constrained to terminate Mr. Poussin's official intercouse wiin this Government, and thus preclude an opportunity which might be again abused.

4th. That the relations thus terminated between the Minister of France and the American Government do not imply or necessarily lead to a cold or hostile intercommunication between the two governments In the case of Mr. Jackson, Minister of Great Britain, whose relations with this government were terminated by Mr. Madison in 1809. in a more peremptory manner, and for less pointed insult, no difficulty arose between this country and England. Suffice it to say for the present, that, unless France is emulous of a difficulty with this country—of which we have no evidence in any thing that has hitherto transpired,—there can be none.

Finally, that in putting an end to the official relations of Mr Poussin with the United States, the Executive has informed both the government of France and the late minister of France, that any communication through any other channel will be respectfully received and considered.

These are the conclusions arrived at from the facts which have been fully set forth in the Express. We find no new facts introduced in the official statement, and they are in brief:—

That Mr. Porte, the French claimant for indemnification, presented through M. Poussin, an appeal from the sentence of a military court martial at Puebla, approved by Gen. Scott, but which was adverse to his claim. This appeal was to Mr. Buchanan, who left the answer to Mr. Clayton; and within ten days after the subject was brought before Mr. C., he announced to Mr Poussin that he had arrived at the conclusion that Mr. Porte had no just cause to be dissatisfied with the award of the military court of Inquiry.

Mr. Poussin rejoins on the 13th of March, by reviewing the decision of the Court at Puebla, and by severe animadversions upon a distinguished officer at Puebla, who had been a witness in the case. This reply was deemed offensive, but was nevertheless answered on the 10th of April, by the Secretary of State, who gave additional reasons for his confirming his previous decision.

On the 18th of April Mr. Clayton received another note from Mr Poussin, in which the minister indulged in a strain of invective evidently intented to be highly offensive to the American Government. The correspondence was immediately submitted by the Secretary of State to the President, who directed him to lose no time in requesting Mr. Poussin, then in New York, though his note was dated Washington, to repair to Washington without unnecessary delay. One offensive passage in the letter of the 18th, was as follows:

"*The Government of the United States must be convinced that it is more honorable to acquit, fairly a debt contracted during war, under the pressure of necessity, than, to evade its payment by endeavoring to brand the character of an honest man.*"

Another offensive imputation in the same note was a virtual charge of perjury against the American officer referred to, and also an attack upon the distinguished officers composing the court, who were charged with permitting that officer "to carry out, without interruption, his string of calumnies incredible." The note closed with an insinuation that the State Department had become the organ of a criminal accusation, without proofs, against Mr. Porte.

The Secretary of State, in view of this note, wrote April 21st, to Mr. Poussin as follows:

"After a perusal of your note, which was laid before me this morning, I lose not a moment in requesting you to repair to the city without delay."

An interview followed between the Secretary and Minister which resulted in the withdrawal of the letter and its return experogated of its most offensive matter. Anxious now to maintain friendly relations with the minister, the President here permitted the matter to drop, and the correspondence with regard to the claim of Mr. Porte terminated. On the 12th day of May, however, M. Poussin, in a diplomatic note, represented to the State Department as follows:

"That Mr. Carpender, the commander of the American war-steamer Iris, after hastening to the assistance of the French ship Eugenie, of Havre, which had struck on the bank of Riso, near the anchorage of Anton Lizardo, advanced claims wholly inadmissable, on account of remuneration for his services, and, to secure their acquittal, detained the Eugenie for two or three days. In consequence of the energetic remonstrances of M. Lavallee, and the honorable intervention of the consul of the United States at Vera Cruz, Commander Carpender desisted from his pretensions.

Mr. Poussin proceeded to say that "the minister of foreign affairs of France requested him to address, to the cabinet at Washington, the most serious observations on the abuse of authority committed by this officer, in illegally detaining the ship Eugenie."

He concluded his note with the following remarks:

"You will easily comprehend, Mr. Secretary of State, how important it is that such occurrences should not be repeated, and that severe blame, at least, should be laid on those who thus considered themselves empowered to substitute arbitrary measures for justice: and I doubt not that you will, without delay, give satisfaction to the just complaint of the French republic."

Mr. Clayton submitted this rude note, unaccompanied by any testimony against Commander C., to the navy department, for the purpose of ascertaining the facts in the case. May 24th, the Secretary of the Navy, in reply, sent all the information bearing upon the case, and consisting of two letters only from Commander Carpender himself, dated, the one New Orleans, the 16th November, 1848: the other New York, the 19th May, 1849. In the absence of any evidence of conflicting facts, the President thought that the character of that office made it incumbent on him to submit to the French minister, the explanation given by Commander Carpender, and to express, at the same time the hope—

"That they would remove any misapprehension which might exist on the part of the French government relative to his conduct on the occasion in question."

The note to the President was not only most respectful, but the explanation of the officer gave the following fact:

"That the commander, seeing the French bark Eugenie and her crew in imminent peril, high up on the rocks of Anton Lizardo, and being appealed to for succor, hastened to her assistance, with seamen from the Iris; and that the captain of the French bark gave up the charge of his vessel on the reef, in order that the American officer might take the command, to save her. At a moment when no other aid could be procured, and when a norther, so formidable to seamen on that coast, was expected, the American commander labored all night with his sailors, got the French bark off the rock, and anchored her safely alongside the Iris."

For the above enumerated service salvage was demanded for saving vessel and crew. The Republic says that he was entitled to salvage So it was decided by Mr. Clifford, our minister to Mexico, (late Attorney General of the United States) when the matter was referred to him. Such also, it is understood is the opinion of our present Attorney General. But although he had asked and expected to receive salvage, yet [to use his own words.]

"Thirty hours having elapsed without receiving an answer, he had already resolved to let the captain resume the charge of her, when he received a note from the consignee saying that he could not act in the matter, as the vessel was not yet in port; and at the same moment, the captain of the Eugenie coming on board, he returned the vessel to him."

It was under these circumstances that M. Poussin wrote the note of the 30th May last, which we have already copied. To these facts we may add that the officer complained of, had promised his men salvage for the service performed,—that they had TWICE rescued the vessel and crew, and that under circumstances severely trying to the men employed and himself.

Here ends the gist of the matter; but two or three reflections suggest themselves at this point of the controversy.

The French Minister in his correspondence has gone so far as to demand that the President should disavow a law of the land, and the usages of nations. It is sufficient to answer that it is not the province of the Executive to make or repeal laws; it is his duty to execute them as they actually exist.

Again, the defence of Commander Carpender was placed in hands of the French minister with the expectation of its being forwarded to the French government; and with the hope, expressed by the President, that an inspection of the papers would remove the misunderstanding which existed in regard to his conduct. M. Poussin. instead of the reference, denounced the commander anew, and without considering his defence, which he regarded as matter of little interest in his eyes.

An imperious refusal to permit an American officer to be heard in his defence by the government which accused, was not made more palatable to the Executive by the contemptuous sneer that accompanied it, and it was felt to be due to Commander Carpender that he should not be condemned without evidence or a hearing; and a refusal of so common a right was deeply felt, as unjust, insolent, and rude. There was no evidence against him, and M. Poussin decides that he had committed an act which derogated from "the dignity of the national marine," and proceeds to implicate the American government in the discreditable conduct of its officer. Notwithstanding all this, the President was actuated by a profound regard for the existing friendly relations with a sister republic, and a sincere desire that those relations should continue undisturbed—the whole correspondence was communicated to his excellency the Minister of Foreign Affairs of France, on the 7th July, by Mr. Rush.

The conduct of the French Minister of Foreign Affairs in France has not, as has been seen, improved the state of facts which followed the receipt of the offensive letter of the 30th of May, and the future is therefore left entirely to the French nation.

THE HEALTHIEST AND PLEASANTEST ROUTE TO NEW YORK—On the 24th December the fast sailing white oak built ship Clarissa Perkins, Captain Goodrich, will be dispatched to *Realego*, with passengers for New York, via. the Lakes of Nicaragua.
This route is 1000 miles nearer than by Panama, and, avoiding the tropics, passes through a perfectly healthy country, abounding in the finest fruits, oranges, pine apples, melons, plantains, bananas, etc., and provisions of every kind.
A ride of three days from Realego, thro' the fine cities of Leon and Granada, and along the picturesque shores of Lakes Leon, Maraya and Nicaragua, brings the passengers to the waters communicating with the Gulf of Mexico.
Passengers will be conducted across under the guidance of A. Y. Bequer, Esq., as interpreter and caterer, and Dr. Donaghe, of New Haven, as physician: these gentlemen having recently arrived from Nicaragua. Mules for travelling, and all needful accommodations, are prepared.
A clipper-brig will convey passengers from St. John's, on the Gulf of Mexico, to New York. The trip through is much safer, healthier, more pleasant and as quick as via. Panama. A liberal scale of provisioning is adopted by the proprietors of the line.
Passage through to New York (including travelling expenses and board in crossing), in the cabins, $275, and in the steerage, $220. George Gordon.
Passage may be secured by applying to Macondray & co.,

TOWN OF BOSTON.—Lots at the town of Boston, beautifully situated at the junction of the American Fork and Sacramento rivers, are now offered for sale. The town of Boston is only a few hundred yards above Sutter's Embarcadero, on the north side of the American Fork, and in the immediate vicinity of the gold mines, and from its situation possesses superior advantages for business purposes. The land which forms the site of the town is twelve feet above the highest water mark, and the river is twenty-three feet in depth at the banks. It is believed that no place offers greater inducements for investments than this town, as in addition to the above mentioned advantages it has a fine climate, good soil, with an abundance of excellent water, and is free from inundation at all seasons. The town has been surveyed by Mr. J. Halls, and laid out in a convenient manner, and a plan of it can be seen, and any other information relating to it obtained on application to

LOTS FOR SALE *in the city of south San Francisco*, offering the greatest inducements to persons recently arrived, who are desirous of locating themselves with superior advantages. The city of south san Francisco is situated two miles south of the city of san Francisco, immediately on the bay, having every advantage for the shipping, and is supplied with wholesome water in great abundance. A stream of sufficient quantity to supply both cities and all the shipping that ever may lay in their harbors, forms the northern boundaries of this place—is quite accessible and is about being conducted into reservoirs for that purpose. The harbor is more securely protected from the winds than the harbor of san Francisco, and ships of the heaviest burthen may at all times of the tide lay within a boat's length of the land at many points, and quite close along the whole front of the city, affording the best facilities to discharge cargo. The soil is free of dust, and is of a rich clay nature. There are extensive stone quarries, and springs of pure running water are in many places. The surrounding scenery is highly picturesque, and a more pleasant place for residences, or a more convenient place for business is not to be found on the bay. The only good road from the city of san Francisco to the Pueblo of san Jose passes through south san Francisco, crossing the mouth of Mission creek and the mouth of the stream of fresh water already alluded to On this road you travel along a beautiful valley of firm grass land to the puertesuelo, a distance of less than two miles. Persons desirous of purchasing lots, which will wholly equal in value those of the City of San Francisco and provide for themselves residences on moderate and easy terms can do so by calling at the office of the undersigned in Clay st., where full particulars will be given them. HUNTER & BROTHER,
Agent for the Proprietors.

A good House with everything necessary for the accommodation of visitors is now established at south San Francisco.

CAUTION.—Whereas, one J. A. Sutter has published a notice, in which he claims title to the land on the east bank of the Sacramento river, between the Feather river and the American Fork, I hereby notify the public that I am the only legal owner of the said land, under a warranty deed from J. A. Sutter himself, dated Aug. 10, 1843; and I therefore caution all persons that no legal title can be acquired to the same, or to any portion thereof, except through me. Justice to myself requires me to add that I shall hold the said J. A. Sutter legally responsible, both for the libel on my character, and the slander of my title, which his notice contains; and that if its publication is the result of a conspiracy to defraud me of my property, I shall take care that the offenders be brought to justice as soon as a criminal court before which they can be tried, is legally organized in this territory.

Any person desiring to satisfy himself of my title to the above land, is invited to call on W. H Tiffany, at Boston, or on the undersigned. at his office, sacramento street, san Francisco. Hiram Grimes

CUSTOM HOUSE,
San Francisco, Dec. 6, 1849.

NOTICE—The undersigned has just received a New York paper, containing the circular which follows, from the Secretary of the Treasury. It will be seen that the secretary has *settled* the question about to be submiited to him from this District. It will, therefore, be understood that the Law, with *all* its *penalties*, will be hereafter enforced. J. Collier, Collector.

CIRCULAR TO COLLECTORS AND OTHER OFFICERS OF THE CUSTOMS.

TREASURY DEPARTMENT,
July 26th, 1849.

It is represented to this Department, that in some of the ports of the United States, the erroneous practice prevails of admitting the importation of gin and other distilled spirits, in cases or vessels of less capacity than ninety gallons.

By the provision of the 103d section of the general collection act of 2d March, 1799, the importation of any distilled spirits (arrack and sweet cordials accepted) unless in casks or vessels of the capacity of 90 gallons wine measure, and upwards, subjects the said spirits to forfeiture, together with the ship or vessel in which it is imported. The act of 2d March, 1827, makes a farther exception, as it relates to brandy, admitting that article in casks of a capacity not less than fifteen gallons; but with this single modification, the prohibiory provision of the act of 1799 above cited, remains unrepealed, and must therefore be strictly enforced.

It is due to the importers within those collection districts in which the erroneous practice referred to has existed, that they be immediately apprised, by a public notice from the Collector's Office, of the views of this Department in regard to importations of the article in question.

W. M. Meredeth,
